IIROC Internet Services

The Investment Industry Regulatory Organization of Canada (“IIROC”) is committed to maintaining the values of integrity, diligence and accountability with respect to the privacy of personal information within its control.

As part of this commitment, from September 1, 2017 onwards, IIROC will only support internet connections to online services that use the following web browsers and applications:

- Microsoft Edge (all versions);
- Internet Explorer 11 and above;
- Chrome 49 and above;
- Safari 6 for iOS 6.0.1 and above;
- Safari 7 / OS X 10.9 and above;
- Firefox 27 and above;
- Android 4.4.2 and above;
- OpenSSL 1.0.11 and above; and
- Java 8u31 and above.

Previous versions of these web browsers and applications are known to use weak SSL/TLS connections and cipher configurations and, as such, will no longer be supported. After August 31, 2017, a connection using these older versions will result in an error message stating that the web browser is not compatible.

IIROC members who are using browser or application versions older than those listed above to connect to IIROC online services must perform an upgrade to avoid service disruption.

More information on IIROC's privacy code is available at http://www.iroc.ca/Documents/Privacy_en.pdf.
