List of Foreign Exchange (FX) Spot Risk Margin Rates for Canadian and U.S. Base Currency Accounts

OVERVIEW:

This list is published when a Group 1, 2, or 3 currency's spot risk margin rate is increased, because the volatility of the currency exceeds the volatility threshold that is set out in Dealer Member Rule 100.2(d)(v)(B)(a). In addition, the list is also published when the increased spot risk margin rate for the currency is reduced, because a minimum of 30 trading days has passed since the currency's spot risk margin rate increase and the currency's volatility no longer exceeds the volatility threshold.

Excess volatility in a currency is measured and tracked as an "offside day". An offside day is triggered when the percentage change in the exchange rate of the currency over five-day intervals, through a period of 60 trading days, exceeds the margin rate for the currency group. When the number of offside base days during the period reaches 4, a margin surcharge is applied.

A Dealer Member must use the spot risk margin rates provided in the attached list, and Dealer Member Rule 100.2(d) in margining unhedged foreign exchange customer and Dealer Member (inventory) positions and any other customer and Dealer Member transactions that result in an exposure to foreign exchange risk.
